Rotary scissor / Snip-Snip cleaner

universal /suitable for many brush cutters due to special gear ratio

Article no.	Description
292991.000000	Rotary scissor / Snip-Snip cleaner, universal

Cutting width 230 mm, two counter-rotating, oscillating blades (scissor cut principle) prevent stones or other objects from being thrown away during mowing. The waterproof housing also makes the rotary scissor suitable for underwater mowing work.
Five plastic pipe adapter sleeves (Ø 24, 25, 25.4, 26 and 27 mm - 28 mm adapter) and an identification template for the drive shaft are included in the scope of delivery.
The rotary scissor should be used with a minimum torque of 0.90 Nm (corresponds to approx. 6,000 rpm for a 23 cc brush cutter). In general, the shears do not require much torque. Optimal use with devices with 25cc to 33cc.

ATTENTION!
Please note that the corresponding shaft adapters are required for mounting. **These are not included in the delivery!** Suitable adapters (templates index):
A = order no. 6-636 (9 teeth)
B = order No. 6-635 (8 teeth)
C = order No. 6-634 (7 teeth)
